

Hello Sir,

Good day!

As discussed over a call, I am sharing the below-detailed JD for the Jr. Software Expert role.

Kindly check the below-detailed Job Description and attached company profile and suggest further participation in the campus drive.

About Us:

The Logic Factory helps customers make lasting performance improvements in their supply chain by delivering high-end planning, scheduling, and optimization solutions for manufacturing, logistics, and workforce. We believe in building long-term relationships based on mutual trust – as a valuable partner that supports your business growth.

Proud to be a certified DELMIA Quintiq Platinum Partner, we specialize in the development of advanced software solutions for customers across a broad range of industries, including Food & Beverage, Retail, Logistics, Postal & Express, and Manufacturing. We excel in fully executing DELMIA Quintiq planning and optimization implementation projects, additionally, we offer support & application management and hosting of all DELMIA Quintiq environments.

We are headquartered in Den Bosch, The Netherlands, and have offices in Ahmedabad, India; Ardmore PA, United States and Liverpool, United Kingdom, which enables us to offer customers global coverage.

For more information about us, please visit www.thelogicfactory.com.

Current opening: “Jr. Software Expert.”

Working within a project team, you are responsible for the technical execution of implementation projects: you design, build and test supply chain planning and scheduling optimization applications based on business analysis. This requires not only excellent technical skills, but especially the ability to understand and translate a real-world planning or scheduling problem into a planning application. You will use the Quintiq modeling language (Quill) to configure a solution tailored to the customer needs. You will be continuously dared to work on solving complex business puzzles and having a regular interaction with your other colleagues around the globe. You will grow your industrial knowledge as well as your technical knowledge at a tremendous tempo, enabling you to perform for variety of roles in project teams such as

Software Expert, Technical Consultant or, Operation Research Scientist, depending upon your ambition and your skills.

You will be working in a dynamic, international environment for customers in various industries like aviation, logistics, and retail.

Job requirements:

Strong understanding of Object-Oriented programming concepts

Should be familiar with an object-oriented platform like Java, C++, C#.NET, ASP.NET

Strong knowledge about SQL Server or Oracle databases

Have strong problem-solving skills in complex environments, ability to replicate, diagnose and resolve problems

Have a flair for solving complex logical puzzles and a passion for solving high-end Supply Chain

Planning and Scheduling solutions and algorithms

Are a team player comfortable working in an international environment

Fluent communication in English is MUST.

Willingness to travel abroad for projects as and when required.

Educational: B.E / B. Tech (IT/CE) or M.Sc – IT or MCA with sound knowledge in Software Engineering and Operations Research.

Job Location: Ahmedabad – Gujarat.

Interview Process: Candidates need to appear for the offline Written Test; those who pass the test will appear for the Verbal Technical Round, followed by the Case Study Round of interviews.

For the selected candidates, we will be offering them an internship + Job. After completing the internship, they will be directly hired on the payroll of The Logic Factory for the position of “Jr. Software Expert” and will not have any probation period as they have already proven themselves during the training.

This offer is subject to the candidate's performance during their internship; If their performance is not found up to the mark, this offer will be null and void after the internship.

Stipend for the internship: 15 K PM

CTC Range:

For Graduates – Up to 6 Lacs PA

Why join us:

A 5 days work week.

Flexible working hours and Work From Home options (no remote work).

A state-of-the-art infrastructure in Ahmedabad.

Frequently profit sharing

Working in a professional and international culture (India, USA, UK & the Netherlands), communicating with other colleagues around the world.

Fun working environment with regular celebrations and other employee engagement activities.

Fast professional and personal growth in salary and grade.

Note: - For the final presentation, they will get company-approved screenshots as we can not reveal our codes outside.

Kindly suggest a further process for the same
